

Question:

I had close contact with someone who has tested positive for or been diagnosed to have COVID-19 but I am not sick. What should I do?

Answer:

You should stay home and away from others. Check yourself for fever, cough, and shortness of breath for 14 days from the last day you had close contact with the person and do not participate in any soccer club in person activities, including, for example, practices, scrimmages or games for 14 days (self quarantine).
